DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7, 9 are rejected under 35 U.S.C. 102b as being anticipated by Kuzmenko et al. (5311485).

Kuzmenko et al. teaches an interferometer substrate 10 and a parylene polymer film of substantially uniform thickness, in which the parylene film 15 is formed directly on the interferometer substrate 10. (See: fig. 1; col. 3 lines 50-68).

Thus claim 7 is met.

Kuzmenko et al. teaches an interrogation source to provide an interrogation signal to the sensor; and a detector to detect signals received from the sensor. (See, e.g., #22 of fig. 1).

Thus claim 9 is met.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kuzmenko et al. (5311485).

Kuzmenko et al. teaches an interferometer substrate 10 and a parylene polymer film of substantially uniform thickness, in which the parylene film 15 is formed directly on the interferometer substrate 10. (See: fig. 1; col. 3 lines 50-68).

Claim 8 is rejected as a "product-by-process" claim. This type of claim is discussed in the MPEP as follows:

2113 Product-by-Process Claims

PRODUCT-BY-PROCESS CLAIMS ARE NOT LIMITED TO THE MANIPULATIONS OF THE RECITED STEPS, ONLY THE STRUCTURE IMPLIED BY THE STEPS

"[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985) (citations omitted) (Claim was directed to a novolac color developer. The process of making the developer was allowed. The difference between the inventive process and the prior art was the addition of metal oxide and carboxylic acid as separate ingredients instead of adding the more expensive pre-reacted metal carboxylate. The product-by-process claim was rejected because the end product, in both the prior art and the allowed process, ends up

Art Unit: 2877

containing metal carboxylate. The fact that the metal carboxylate is not directly added, but is instead produced in-situ does not change the end product).

The product in the product-by-process claim 8 is the same as or obvious from a product of the prior art invention of Kuzmenko et al. Therefore, the claim is unpatentable even though the prior art product may have been made by a different process.

Thus claim 8 is rejected.

Allowable Subject Matter

Claims 1-6 are allowed.
